

Builder & Designer Pool Builders, Inc.

Project Location: Davie, Florida

Theme: Roman classic

Goal: The goal of the project was to provide the owners with an outdoor entertainment center for the entire family, including those that do not swim. They were looking for a timeless, classical look that still incorporated unique qualities.

Design/Special Features: The freeform shape includes wide semi-circles separated by detailed linear edges. The 24-inch elevated spa forms a centerpiece as water flows down its tiered edge. One of the most unique elements is the large sunken seating area complete with a built-in table, weatherproof seat cushions, and an umbrella. It allows the owners and their guests to be "in" the pool without any need to put on a swimsuit! At the pool's entrance, we incorporated a sun ledge with fountain bubblers. This creates an attractive water feature and provides a convenient place to cool off while socializing.

Materials: Ultra White Pearl Brite (manufactured by SGM, Inc.) was used for the pool's interior finish to provide a sparkling blue look to the water. The coping and decking are travertine, which blends with the stacked stone used on the surrounding planters. Brilliant blue Sisis glass was used on the tiers of the spa, which coordinates with the brown cedar roof of the pergola. *Decking, pergola, and landscaping done by other companies*
